

The Supreme Industries Ltd.

With over six decades of experience in providing innovative and cost effective solutions, Supreme Industries is today an undisputed leader in India's Plastic Industry. The group has an annual group turnover in excess of Rs. 3500 crores. The company offers the widest and the most comprehensive range of plastic solutions from 17 state-of-the-art manufacturing units spread across India. These units process a whopping 1,30,000 tones of polymers annually.

The Supreme Industries Ltd. follows the philosophy of S.A.V.E. Supreme Always Value Efficient. Applied intelligence and innovation, enabling cost-effectiveness and precision in delivery are the drivers of this belief. Every requirement is understood meticulously, various solutions are deliberated upon and the most appropriate one is selected and implemented flawlessly. Trust and reliability are the cornerstones of our delivery promise. Whatever be the value, whether its superior protection, energy saving insulation or durable and long-lasting solutions in the civil / thermal insulation industry our customers are assured of a solution from Supreme. Because at Supreme, every single solution we create is guaranteed to be Value Efficient.

Protective Packaging Division - Equipped to deliver

A powerful synergy of men, material and machines, backed by unrivalled experience, expertise, and a huge infrastructure, enables the Division to render professional services of the highest order. With 3 plants and 8 fabrication units spread across India, we offer solutions for the widest range of industries and applications. For our Construction, Insulation and Packaging Business Units, we manufacture products that are attuned to your requirements, with active inputs from you. We constantly adapt our range of services to the current challenges and recommend you the most efficient, and cost effective solution to that problem. We have been working on avoiding environmental load and have already introduced products that are 100% recyclable and eco friendly in a resourceful and energy-efficient manner.

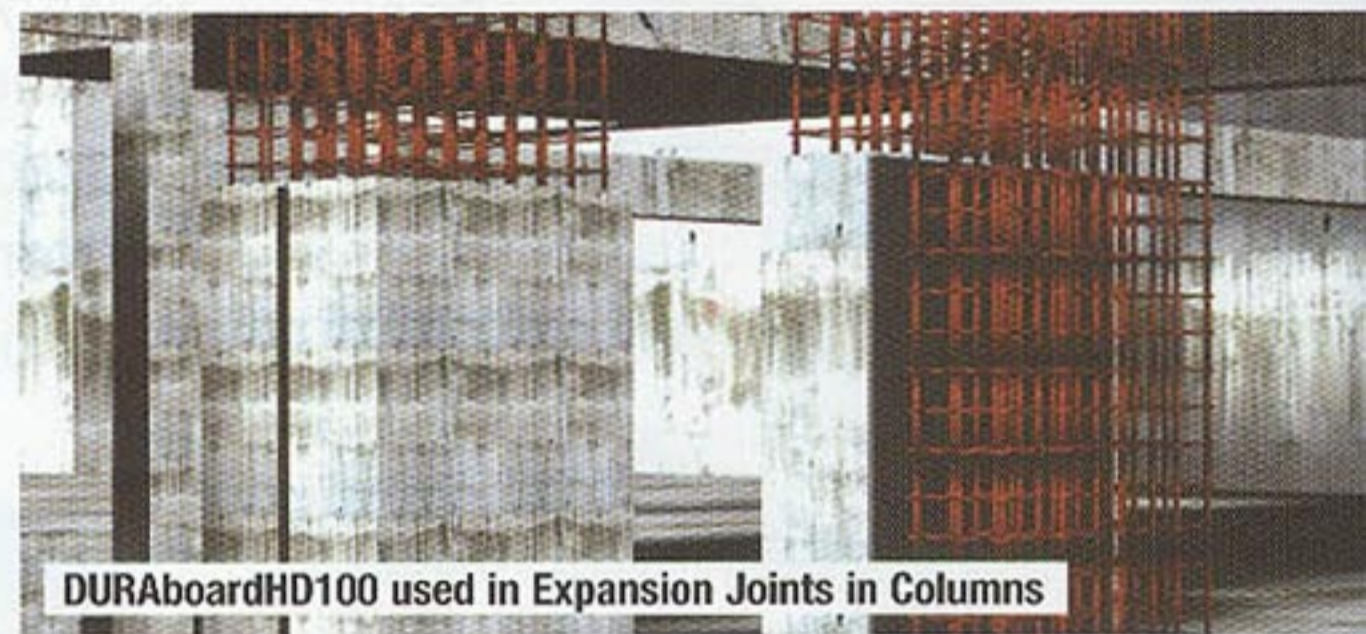

Different Problems, Different Solutions.

We have developed customised solutions specifically for the construction requirements of various segments. All our products have been developed after continuous interaction and understanding the needs of the changing demands of the new generation constructions. Many of these products have been pioneered by Supreme.

Our 'DURA' range of products are manufactured from virgin raw material, and undergo a comprehensive quality check thus assuring the best quality, and thereby offering value for money.

Supreme's Construction Accessories Division offers solutions in following specialized civil applications:

- Expansion joints for Roads and Buildings
- Waterproofing membranes for slabs and walls
- Back-up to sealants
- Overdeck / Underdeck insulation
- Bond Breakers between concrete and shuttering and many more...

The Supreme Advantage

4 primary reasons why Supreme's Construction Accessories Division is a choice of discerning customers seeking superior solutions:

Quality

A methodical, systematic and stringent approach to quality ensures all our products are not only world class but also durable. We adhere to international quality standards while manufacturing our products. ISO 9001:2000 and ISO 14001 certifications and NABL Accreditation for our various plants is a testimony to our serious approach to quality.

Expertise

With intensive R&D and a team of highly qualified, vastly experienced and extremely committed team of professionals, you are assured of high level expertise at work.

Network

Our convenient accessibility promise is backed by an extensive pan India network. The assurance of timely deliveries and serious service ethos is imbibed in our culture.

Environment consciousness

Our responsibility towards the environments extends beyond words and mere promises. Great and strict emphasis is placed on ensuring all our processes, systems and products are eco-friendly.

If your needs are not already featured above, tell us what they are. And you can rest assured; we will specially create solutions that suit your unique needs.
