

SILTANK[®]

Overhead Water Tanks and Loft Tanks

Strong, sturdy and long lasting

The Supreme is an acknowledged leader of India's plastic industry. With a portfolio of over 7500 diverse products, the most comprehensive range in the industry, we cater to almost every conceivable need and application of the customer in piping. While helping the country transit from conventional to modern piping, we have several path breaking products to our credit making us a trend setter in the industry.

After successfully introducing many innovative products for various application segments, there was a demand for quality water storage tanks by our esteemed customers. Looking at repeated demands, we have recently introduced superior quality water tanks under the brand name, 'SILTANK'. Supreme Siltanks are made using virgin raw material in capacities from 100 to 5000 ltrs. Siltank overhead tanks are available in two layered, three layered and four layered configurations in different colors including the ISI variety in black color. The white coloured four layered tanks are thermally insulated using a foam layer to reduce the effects of sunlight keeping water cool in summers and preventing from getting too cold during winters. Recently loft tanks in different sizes and varieties have also been added to complete the range. Besides being elegant, the design of these rib structured tanks made from special compound makes these tanks much stronger and durable. Siltanks are much superior to any other water tank available in the market in terms of strength and performance. In short, Siltank is a "value for money proposition" that will delight our customers.

IS :12701

CML :7700033714

Unique Features

- Made from 100% virgin raw material
- Tough and durable
- Easy installation
- UV stabilized
- Excellent chemical resistance
- Full capacity guaranteed
- Rotationally moulded for maximum strength and performance
- Rigorously tested to ensure the quality. Meets and exceeds all quality parameters as specified in BIS.
- Strong and compact cover with locking provision for easy opening and closing
- Four layered tanks are thermally insulated using foam layer.

100 % Virgin Raw Material

Four Layered For Thermal Insulation

Food Grade Material

UV Stabilized - No weather effect

Easy Opening & Closing of Covers

Product Range

Overhead water tanks -

- Two and three layered tanks - 200, 300, 500, 750, 1000, 1500, 2000, 3000 and 5000 ltrs.
- Four layered tanks - 200, 300, 500, 750, 1000, 1500 and 2000 ltrs.
- BIS variety tanks in black colour- 200, 300, 500, 700, 1000, 1500, 2000, 3000 and 5000 ltrs capacities in two layer variety.

Loft tanks - 100, 150, 200, 300, 400 and 500 ltrs.

Colour codes - 2 layered tanks in black colour, 3 layered tanks in blue, brown, green, yellow and white colours, 4 layered tanks in white and yellow colours.

Advance Features

100% Virgin Raw Material- Manufactured from 100% virgin polyethylene, Siltank promises superior quality and long lasting performance.

Strong and durable - Unique and innovative design of the ribs makes it more strong and sturdy as compared to regular products available in the market giving it an edge over others. It also makes it strong against bulging when filled with water. Siltank has a very good impact strength and is virtually unbreakable.

Thermal Insulation - Provision of a foam layer in the four layered tank together with its white color, improves the insulation and keeps water cool in summers. It also keeps water reasonably warm during winters. These factors help to maintain a temperature difference of around 15°-20°C from the atmospheric temperature.

UV Stability - UV stabilization prevents degradation of material due to effects of ultraviolet rays and ensures that the tank does not develop any cracks or loss of physical properties.

Most Suitable For Drinking Water - Use of food grade plastic ensures its suitability for potable water as water does not get affected even when stored for long durations.

Easy Installation - Built in provision of hooks for lifting the tanks to higher floors makes the installation easy.

Strong Covers - Specially designed injection moulded covers are much stronger than normally available light weight covers in the market. Their simple threaded design is very convenient for opening and closing.

Full Capacity Guaranteed - Unlike many commercial tanks, the storage capacity of Siltank is at least equal to the specified storage capacity of each tank.

First layer in white

UV stabilized, non colour fading layer which provides structural strength.

Second layer in black

To prevent entry of sunray's inside the tank causing algae formation.

Third layer of foam

Insulation layer to maintain water temperature inside the tank. Helps to keep water cool in summers and preventing it from getting too cold in winters.

Fourth layer in white

Use of food grade plastic makes it highly suitable for potable water.

Installation Guidelines

- 1) Provide full bottom levelled support wherever necessary.
- 2) Before installation, ensure that the top surface of the bottom support is plain and free from any sharp edged metal pieces/stones to prevent damage.
- 3) Outlet connections should be drilled at least one inch from the bottom.
- 4) Ensure proper support for inlet(s) and outlet(s) pipes to avoid undue pressure/stress on the tank body.
- 5) Use drill machine to make the holes into the tank and ensure holes of proper sizes.
- 6) Do not allow the tank to remain dry for long durations once it is put to use.
