

# The Supreme Industries 'DURAblockfiller'

Supreme's 'DURAblockfiller' - special purpose, lightweight, rigid, high density filler board. It is specially formulated to support heavy load / human traffic movement on the slabs. 'DURAblockfiller' is an ideal replacement for conventional brick-bat coba as well as other space filler applications.

It is lightweight hence reduces the structural dead load by more than 70% as compared to brick-bat load. Its quick & simple application saves time and costly labor contributing to timely completion of projects. 'DURAblockfiller' has closed cell structure therefore water absorption is very low. It also has high load bearing capacity with low deflection. It is fire retardant and self extinguishing. ■

## SUGGESTED APPLICATIONS IN:

- Replacement of Brick-bat coba
- Flat metal decks
- Gap filling in inverted beams
- Green roofs
- Balconies and terraces
- Sunk portion fillings
- Elevated seating in Auditoriums
- Membrane protection
- As a lightweight filler additive to be used along with Sand mortar
- Geo technical filler
