REIGN SUPREME WITH DURABOARD HD100

*'DURABOARDHD100'
from Supreme
Industries is all
weather compressible
filler board specially
designed to be used as
expansion joint filler.*

THE STRIKING FEATURES OF 'DURABOARDHD100' ARE:

- Bitumen free - can be cut in any size with a normal knife
- Excellent recovery of 95 per cent after compression up to 50 per cent
- Polymer based – hence it won't deteriorate also over a long period
- Resilient and does not distort under normal load from wet concrete
 - Non-staining

The construction industry across the world, is witnessing a tremendous boom. The role of organizations like Supreme Industries in supporting the construction industry has become prominent and critical. Exposure to world-class expertise and advent of global players has led to infusion of new materials, equipment and technologies in the construction practices in India. 'DURABOARDHD100' from the Supreme family nevertheless is a testimony to the same.

Throughout the year, building faces, concrete slabs and pipelines expand and contract due to the warming and cooling through seasonal variation, or due to other heat sources. If expansion joints were not implemented in bridges, building, highways etc. the intense heat in the summer would expand the metal, brick, or concrete materials in a structure resulting in developing cracks and may at the end could break. 'DURABOARDHD100' (formerly SILflex/Capell HD100) is an exclusive compressible filler board specially designed to be used as expansion joint filler in concrete brick, block work and isolation joint, it is readily compressible and low load transfer joint filler with excellent recovery property.

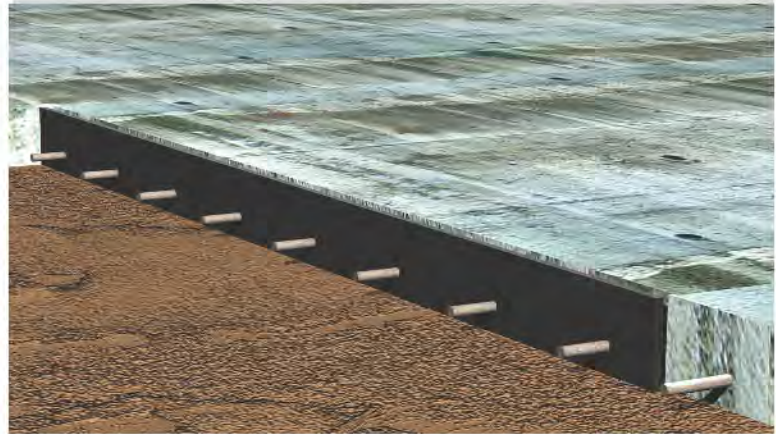

'DURABOARDHD100' is an offering from the Construction Accessories Division of Supreme. The Construction Accessories Division of Supreme has developed customized solutions specifically for the construction requirements of various segments. Ajay Mohta, General Manager, Construction Accessories Division, the Supreme Industries Ltd adds "This division offers new generation, better alternative products to conventional materials like rubber, metals, and wood, thus being cost effective. The 'DURA' ranges of products are manufactured from virgin raw material and we do not use any CFC / HCFC gases. At every stage of the manufacturing process, a stringent quality check methodology assures the reliability

of the products, a case in point is the creation of a low compression set filler board 'DURA-boardHD100' especially for expansion joints application, to replace less effective bitumen board based solutions".

'DURABOARDHD100' has a number of satisfied customers in government, semi-government and private installations. Massively used in PQC & various structures for NHAI, AAI, real estate and British specification & specification for highways works clause 1015. 'DURA-boardHD100' is bitumen free and can be cut in any size with a normal knife since its polymer based it is rot proof and bacteria resistant. The product is sustainable and does not deteriorate over a long period of time nor does it distort under normal load from wet concrete, being very light weight it is very easy to handle and install. Being polymer based, it is rot proof and bacteria resistant. ■

'DURABOARDHD100' CAN BE USED IN:

- Expansion joints in building, concrete structure
- Expansion joints in concrete roads, parking areas, industrial flooring etc.
- Joints in bridges, decks, water retaining and water excluding structures etc.
- Isolation joints in machine foundation.

Think Adhesives / Glues / Emulsions
Think Us

MANUFACTURERS OF WATER BASED ADHESIVES, GLUES & EMULSIONS

AREA OF APPLICATION

- FURNITURE MANUFACTURING
- WOOD WORK
- WOOD TO WOOD PASTING
- WOOD TO PLY PASTING
- ART & CRAFT, STATIONERY
- FABRIC GLUE
- TABLE GUM

- STICKER & PASTING ADHESIVE
- LAMINATION ADHESIVE
- DECORATION (Pandals, Idols etc.)
- MAKING KITES, MARRIAGE CARDS
- MAKING GIFT BOX, PHOTO FRAME
- RAKHI, BINDI
- AQUA & UV VARNISH

All are Welcome: Architects, Interior Decorators, C & F Agents, Distributors, Retailers & Agents etc.
