### Composite LPG Cylinder

Company is receiving many enquiries and positive feedback, still no major break-through could be achieved yet. Company got approval from Korea Gas Safety Corporation (KGS) for other 2 sizes of 12.5 Ltr and 30.5 Ltr. Company is optimistic about the product and its potential. Government refineries have floated an education order in two sizes of cylinders i.e. 12.5 Ltrs and 24 Ltrs. The Company has PESO approval for the same. Company shall participate for these sizes and expects positive outcome. It may take some more time for a significant break-through then envisaged both in domestic as well as export market.

## Raw Material Scenario

During the year under review, the Company witnessed volatility in the polymer prices between July, 14 to June 15. Such volatility has affected the growth in the consumption of Plastics in the country's economy. Polymer consumption in the country has witnessed a growth of 8% between July 2014 to June 2015. Our per capita consumption of plastics is about 10 kg compared to 50 kg in China and thus there is a huge potential for growth. Company believes that in the year 2015-16, the prices of polymers will move in a narrow range. Company also hopes that volatility witnessed during last year may not be repeated.
