

Energy Policy

Purpose

The Supreme Industries Limited is committed to efficient and responsible energy management to support sustainable, low-carbon growth. We integrate energy performance into our strategy, operations and decision-making to reduce environmental impact, enhance resource efficiency and contribute to climate action.

Scope

This policy applies to all manufacturing units, offices, utilities, processes, employees, contractors, suppliers and the entire value chain.

Objectives

- Improve energy efficiency across operations and the value chain.
- Reduce energy consumption and energy intensity.
- Increase the share of renewable and low-carbon energy sources.
- Contribute to reduction of greenhouse gas emissions through optimized energy use.

We are committed to:

- Measuring, monitoring and analysing energy consumption and establishing energy baselines and intensity metrics.
- Improving operational efficiency through process optimization and adoption of energy-efficient technologies.
- Promoting use of renewable energy through on-site and off-site solutions.
- Integrating energy performance considerations into design, procurement and lifecycle management of equipment and infrastructure.
- Conducting periodic energy audits and implementing identified improvement actions.
- Incorporating energy considerations into capital investment decisions and operational planning.
- Engaging employees and stakeholders to promote responsible energy use and innovation.
- Promoting energy-efficient practices across the supply chain.

Governance & Accountability

The Board and senior leadership oversee energy performance and ensure its integration into business strategy. Energy-related risks and opportunities are embedded into decision-making processes, with clear accountability across all levels. Performance is regularly monitored, reviewed and disclosed.

Compliance & Transparency

We comply with all applicable energy regulations and standards and strive to go beyond compliance through continuous improvement. We ensure transparent, accurate and timely reporting of energy consumption, intensity and performance.

Sustainable Supply Chain

We promote energy-efficient practices across our supply chain and integrate energy performance considerations into procurement and vendor evaluation processes.

People & Culture

We build awareness, competence and ownership among employees and stakeholders and encourage responsible energy use and innovation.

Continuous Improvement

We set objectives, track performance and continuously enhance energy efficiency through innovation, digitalization and adoption of advanced technologies.

Communication & Awareness

This policy will be communicated to all employees, contractors, suppliers and stakeholders and will be made publicly available for reference.

Review

This policy shall be reviewed annually or earlier as warranted for its suitability and updated as necessary.

S J Taparia
