

Water Policy

Purpose

To establish a unified framework for responsible water stewardship across The Supreme Industries Limited's operations, supply chains, and surrounding communities, ensuring long-term sustainability, regulatory compliance and shared value creation.

Scope

This policy applies to all manufacturing units, offices, depots, fabrication units and supply chain partners of The Supreme Industries Limited across India.

Objectives

- Promote responsible and efficient use of water across operations and value chain.
- Minimize freshwater consumption and enhance water recycling and reuse.
- Manage water-related risks and ensure regulatory compliance.
- Contribute to water conservation and community water security.

We will achieve our commitments through:

- Recognizing water as a limited and shared resource critical to communities, ecosystems, and business continuity.
- Complying with all applicable water-related laws and striving to go beyond regulatory requirements through proactive measures.
- Promoting water-use efficiency, recycling, reuse, and Zero Liquid Discharge (ZLD) feasibility wherever technically and economically viable.
- Mapping, monitoring, and measuring water use across all operations.
- Identifying and managing water-related risks and integrating them into business decision-making.
- Disclosing water-related risks, usage, and performance through ESG reporting frameworks.
- Engaging with technical solution providers, research institutions, and industry experts to adopt innovative water management practices.
- Building internal capabilities by promoting training, awareness, and shared responsibility for water stewardship.
- Collaborating with supply chain partners to promote responsible water practices and alignment with sustainability principles.
- Supporting watershed-level conservation initiatives including recharge, pollution prevention, and ecosystem restoration in partnership with local stakeholders.
- Promoting inclusive water governance by considering community needs and shared water access in planning and decision-making.

Governance & Accountability

The Board and senior leadership oversee water stewardship performance and ensure its integration into business strategy. Water-related risks and opportunities are embedded into decision-making processes, with clear accountability across all levels.

Compliance & Transparency

We comply with all applicable water-related laws and ensure transparent monitoring, reporting, and disclosure of water consumption, risks, and performance.

Sustainable Supply Chain

We promote responsible water practices across our supply chain and encourage suppliers to adopt water-efficient and sustainable approaches.

People & Culture

We build awareness, competence, and ownership among employees and stakeholders to support responsible water management and conservation.

Continuous Improvement

We are committed to continuously improving water performance through innovation, technology adoption, stakeholder engagement, and regular review of water management practices.

Communication & Awareness

This policy will be communicated to all employees, suppliers, and stakeholders and will be made publicly available for reference.

Review

This policy shall be reviewed annually or earlier as warranted for its suitability and updated as necessary.

S J Taparia
